## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 17, 2004 has been entered.

### ***Terminal Disclaimer***

The terminal disclaimer filed on December 17, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Pat. No. 6592883 B1 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6 and 9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,703,032 B2.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are directed to a Pickering emulsion comprising 1) an oil phase, 2) a water phase, 3) microfine particles of amphiphilic boron nitride that are dispersed in both in water and in oil, and 4) at most 0.5 % by weight of one or more emulsifiers.

While the microfine particles of the '032 patent have an average particle size of less than 200nm, the limitation of claim 1 of the present application is met because claim 1 does not require average particle size. Both inventions require emulsifier-free emulsion. See claim 2 of each set of claims. The additives of claim 3 of the instant application is met by claim 8 of the '032 patent. The amount of boron nitride as claimed in the present application is also met. See instant claim 4; claim 3 of the patent. The particle size limitations of claims 5 and 9 of the instant application are also met because the instant claims require particle size to be less than 20 microns and 15 microns, respectively, which is within the scope of the patented invention. In the present application, the modified polysaccharides limitation of claim 6 is met since the composition of the '032 patent contains cyclodextrin. See '032 patent, claim 1. Thus claims of the present application are obvious to the claimed invention of the '032 patent.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-11, filed on December 17, 2004, have been considered but are moot in view of the new ground(s) of rejection.

Applicants' arguments regarding the enablement rejection made under 35 U.S.C. § 112, first paragraph, in the previous Office action dated August 13, 2003, are moot as the rejection is withdrawn in view of applicants' remarks.
